

Tactical PTZ Camera: Venticam

Specifications:

Venticam	
Telescopcam available	FALCON Starvis Zoom 30X 2MP FALCON Darkfighter Zoom 36X 2MP
Pan / Tilt	Site 30°, azimuth 360° at an increasing speed
Protection Rating	IP67
Housing	Acetal Homopolymer – ABS Turbine
Dimensions	Ø 220mm X 10 cm periscope part
Weight	3.8 kg
Working Temperature	-4°C to +55°C
Colour	Black (default)
Camouflage	Tainted Glass or Grid

Description

The Venticam system, hidden in a roof fan, was designed to obtain the utmost discretion whilst monitoring. It fits on all commercial vehicles. Due to its height, it allows a 360° panoramic view on all vehicles parked nearby.

The camera integrated in the Venticam is a Telescopcam, with an anti-reflective filter making it completely invisible.

The Telescopcam series comes in several models and prices, ULL Darkfighter night vision, and Starvis Low light.

The Venticam is fully motorised and remotely controlled via Wi-Fi, COFDM or 3/4G connection. It has a 360° continuous pan rotation and a 30° vertical tilt.

The Venticam does not allow near vision because of its narrow angle of surveillance but provides vision between 5 metres and several hundred metres. For a close-up vision, we can propose an additional 4 pinhole cameras around the perimeter of the vehicle.

The Venticam exists in 2 colours black or white.
