Complete, ready-to-use set designed for televised borehole inspections.

The comprehensive monitoring case allows you to view and record video, add audio commentary, and overlay text on the screen.

The sturdy wheeled reel enables cable deployment while viewing the video, preventing cable twisting thanks to its fixed section and internal rotating connector.

The camera is easily piloted using the joystick integrated into the case, with adjustable brightness.

For optimal video results, the camera features an adjustable focus from 3 cm.

Description:

- Adjustable focus from 3 cm
